

MURALPLAST EXTRA-FLEX

Elastomeric Masonry Paint That Stretches up to 400%

 Muralplast

MURALPLAST EXTRA-FLEX

Protects Exterior Masonry

With the capacity to stretch up to to 400%, Muralplast Extra-Flex masonry paint is ideally suited to the protection of exterior masonry, roughcast, pebble-dash, brickwork, cement and concrete rendered surfaces. It provides a smooth, satin finish coating that will flex with the substrate and prevent cracking that would otherwise occur with conventional masonry paints.

Water-based and suitable for application by brush, roller or spray, Extra-Flex gives long-lasting protection through a microporous coating that is touch dry in 2 hours and recoatable in 4 hours.

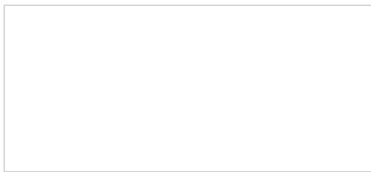

Extra-Flex is available in Brilliant White, Black, Old White, Suffolk Pink, Cream, Sandstone, Portland Stone, Parchment, Buttermilk, Gardenia and Magnolia. Other colours are available subject to minimum order quantities.
